Review of: "A Comparative Analysis of Advertising in the 2020 Presidential Elections & Phoenix Mayoral Elections using Natural Language Processing"

Ahmed I. ElSeddawy[1]

1 Arab Academy for Science & Technology

Potential competing interests: No potential competing interests to declare.

- The researcher presented the problem well, its objectives, and how to solve it.

- The researcher brought a new thought to the research methodology and problem analysis.

- The research topic is one of the recent points that deserves study, analysis, and logical presentation to solve and follow up.

- I hope that the researcher will later present a model for developing and improving solutions to the problem using artificial intelligence, and it will be a future point for those who come up with several solutions.

-

- Thank you for this amazing chance to read this article.
