**Potential competing interests:** No potential competing interests to declare.

1. Title: The title is adequate.
2. Abstract: The abstract is adequately addressed.
3. Introduction: The introduction is adequate.
4. Results: The literature review of telemedicine in the COVID-19 pandemic is well-written and adequately addressed.
5. Discussion: The discussion is well-written and adequately addressed.
6. Conclusions: The conclusion is adequate.

In conclusion, this study is well-written and well-designed. It

addresses important issues concerning the use of tele-education in medicine, during and

beyond the COVID-19 pandemic in a comprehensive and yet concise manner.

Although the study does not contribute novel knowledge or add

sufficiently to the current literature, the manuscript can be considered for

publication in Qeios.
