It is a very interesting topic. It is extremely important to evaluate this aspect compared to religions, but it would also be interesting to compare these beliefs among countries too. My suggestion is that the authors use the data to compare with other countries, because there are many interesting papers about this theme. Example: there is very good data about a Brazilian sample regarding the profile of those who believe in life after death. There are also large studies in the USA and UK about this kind of belief. I will share with you some of these links.

Brazilian paper: Who believes in life after death <https://pubmed.ncbi.nlm.nih.gov/30353309/>

USA data: [a website with a large amount of data about reincarnation beliefs](https://www.pewresearch.org/religion/2021/11/23/views-on-the-afterlife/)
