Review

Abstract, Introduction, Paper Objective(s) and Justification

Generally,

I recommend to expand the literature review as I did not see the MSMEs development from time to time in Africa taking from reputable journals in this article. Therefore, it is not available a brief explanation of why this topic is important and why the study initiated.

Literature Review

I suggest using other definition not only one definition such as definition of financial literacy, financial attitude, financial skill and financial experience, please elaborate more and discuss its definition from other previous research and kindly reveal the best definition and justify.

Second, the authors shall study further about the MSMEs in Africa from reputable journals and articles.

Orthographic and grammatical improvements:

Minor suggestion to enhance the clarity and consistency.

Section 5 (Conclusion):

1. "So, MSMEs owners or managers, as well as government agencies, should pay attention to enhancing the positive financial attitude of MSMEs." - Consider rephrasing for better flow, e.g., "Therefore, MSMEs owners or managers, along with government agencies should focus on fostering their positive financial attitudes."

Redaction improvements:

I highly recommend to re-read the whole text to correct said errors, it would be an impactful improvement.

Conclusion

Overall, it is certainly a good article and interesting topic, I love to read it, however, the article is lack of references that study about MSMEs in Africa including its problems, challenges and development.

Recommendation:

Accept with minor changes (improve on literature review).
