Potential competing interests: No potential competing interests to declare.

- 1- The Abstract should be expanded to include more explanation of the method and results.
- 2- Keywords must be added to the article.
- 3- Discuss previous and related work, if any.
- 4- Presenting a comparison between the proposed method and previous methods, to the extent possible, and applying statistical methods to examine the response to attacks.
- 5- Adding more modern references.
- 6- The conclusion requires reformulation and information about the pros and cons of the proposed system.
