

# Review of: "Investigations on Input Impedance and Radiation Pattern of a UWB Antenna for Microwave Imaging"

Sumon Modak

Potential competing interests: No potential competing interests to declare.

1. The abstract section needs to be rephrased.
2. In the introduction section, instead of introducing different application domains of UWB technology, the authors should focus on a particular application domain related to the proposed work.
3. The introduction section needs to be written in a proper way.
4. Improve the image quality.
5. A comparison table is required in order to compare the superiority of the proposed work.
