## Misdiagnosis of Dengue Fever as Malaria and Typhoid Fever and Their Co-infection in Rural Areas of Southwest Nigeria

Dear Editor

**This manuscript contains valuable information. I think it can be of interest to the readers of this Journal. My comments are as follows:**

1. Please, ethical considerations should be mentioned.
2. Please write a numbering project .
3. Please mention the strong and weak points of your study.
4. Write about the limitations of your survey.
5. Did you have any exclusion criteria? Write about the exclusion criteria of your survey.
6. Please write the type of study?
7. The Code and date of ethical approval should be mentioned in the main text.
8. Mention the name of the admission committee that approved this survey.
9. Please check your keywords with the Mesh database. It seems that the key words need some revisions.
10. Please emanate proposals and precise recommendations from the study results in the conclusion part.
11. Please write the highlights of your study in the discussion.
12. Please write the author or authors, date, order, and family about scientific names.
13. The first paragraph of the discussion should summarize the main results of the systematic.
14. Write the date of this study in the title and text.

15. The validity and reliability of data are not stated.
16. Write other factors that play a role in the spread of dengue and malaria in Nigeria and the world.
17. How can you explain that and let readers know what is the novelty of your survey?
18. What was your sample size formula?
19. In an international journal, names of the localities are not so informative for readers. Instead, the coordinates can be useful.
20. Please write species names in italics.
