UniGene

National Cancer Institute

Source

National Cancer Institute. UniGene. NCI Thesaurus. Code C43563.

An experimental system for automatically partitioning GenBank sequences into a non-redundant set of gene-oriented clusters. Each UniGene cluster contains sequences that represent a unique gene, as well as related information such as the tissue types in which the gene has been expressed and map location. It is provided as a web application from the National Center for Biotechnology Information (NCBI).
