Progress Review Group

National Cancer Institute

Source

National Cancer Institute. *Progress Review Group*. NCI Thesaurus. Code C18960.

These groups are composed of scientists, health professionals, industry representatives and lay advocates brought together to assess the state of our knowledge and identify scientific opportunity and need in such high priority areas of research as prostate cancer and breast cancer. NCI will use the Groups' recommendations to help set a national research agenda in these areas. (National Cancer Institute-Justification of Estimates for Appropriations Committees)
