<The topic is interesting with good writing quality. However, authors should pay attention to the reasons for writing commentary.

A commentary can attract readers to articles in the issue by providing deeper and intriguing expert insights as well as persuasive arguments. Importantly, it doesn't merely present a conclusion; it outlines an argument and invites readers to follow such, assess its validity, and form their own opinion. The purpose of an editorial extends far beyond being a vessel for opinion, however — it's an instrument of influence, a catalyst for discussion, and a promoter of critical thinking. In the end, this type of article can expand the academic influence of its author, its multitudinous readers, and its journal, as it will effectively lead the development of the discipline.
