Potential competing interests: No potential competing interests to declare.

The article presents a very relevant investigation of the use of artificial intelligence (AI) in occupational hazard prevention, which is an excellent starting point for subsequent topics. Expand the discussion section to include a more detailed critical analysis of the current limitations of AI in occupational health. Consider expanding the discussion to include the legal implications of using AI in the workplace. Although the study focuses on the French and European context, it would be useful to explore and compare it with similar initiatives or lessons learned from other regions of the world for the purpose of broadening the state of the art.
