

# Review of: "The Vicious Circle of Climate Challenges With Soil in 5 Continents Caused by Low Cognitive in the Process of Agricultural Revolutions in the World"

Martha Kidemu Negassa

Potential competing interests: No potential competing interests to declare.

In general, the title addresses the current global challenges. I have listed my comments below:

- The sentences are very long. Some are not clear (for example, Definition of low cognitive). Therefore, make your sentences precise.
- Start sentences with capital letters. Don't put a full stop between a sentence and its citation.
- Divide the manuscript into paragraphs.
- Under Introduction, focus on the topic and shorten it.
- Under 1.1, Aim of the study, focus only on the aim. How the literatures were revised should be put under the method section.
- Differentiate the manuscript into Materials and Methods, Results and Discussion, and conclusion (optional).

Good luck!
