Thank you for giving me the opportunity to review this article.

The article is nicely written barring a few points.

My suggestions:

a) Abstract: The term Nutrition screening is not mentioned anywhere, instead NS is written. It would be better to write Nutrition screening (NS) and thereafter use NS subsequently.

b) Body: Eligibility criteria- should be more specific and detailed

Questionnaire needs a more detailed description.

Participants consent issue is not dealt with though IEC is mentioned.

Data analysis should be more detailed.

c) Result: In the write up, table reference number is absent in case of Table 1

d) Discussion: Good.
