Potential competing interests: No potential competing interests to declare.

The subject is an important factor for the improvement of student's creativity who will be innovative researchers in a huge global world with economical racing of countries. But there are many kinds of creativity such as problem solving ability, designing or producing innovative product or thinking differently from the others etc. Therefore at the beginning of article in literature part, creativity must be identified and explained through the historical development and it must be explained why you choose this kind of creativity. Also to test creativity by using one kind measurement tool including the results of observations and close-ended question are not enough for the reliability of research.
