Severe combined immunodeficiency due to DNA-PKcs deficiency

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. Severe combined immunodeficiency due to DNA-PKcs deficiency. ORPHA:317425

Severe combined immunodeficiency (SCID) due to DNA-PKcs deficiency is an extremely rare type of SCID (see this term) characterized by the classical signs of SCID (severe and recurrent infections, diarrhea, failure to thrive), absence of T and B lymphocytes, and cell sensitivity to ionizing radiation.
