

# Review of: "Glycemic Control Is Associated With Lipid Profile and Atherogenic Index of Plasma in Type 2 Diabetes Mellitus"

Jyoti M. Benni

Potential competing interests: No potential competing interests to declare.

It is a cross-sectional study investigating the relationship between glycemic control and lipid profile, including the atherogenic index of plasma (AIP), in men with type 2 diabetes mellitus (T2DM).

- Title: consider including 'A cross-sectional study' in the study title
- Mention the details of inclusion and exclusion criteria for the participants in the methodology.
- Did the participants on lipid-lowering drugs affect the outcome of the study?
- Comment on the association of diabetes and levels of HDL in these participants, as low HDL levels are strongly associated with CAD.
