Potential competing interests: No potential competing interests to declare.

1. Abstract and article article are not structured.
2. Key words are missing.
3. Aims, objectives and methodology is not written.
4. It is just a compilation or narrative review.
5. As it is a narrative review, the references are very less..
6. It has only refer to Veda. But there are so many other classical Indian texts which contain references related with this article.
7. Discussion section should be more elaborative.
