

Review of: "Harmful “Herbalism” maliciously spreading from Mexico determines cases of iatrogenic Cushing's syndrome"

Gerardo Rivera Silva

Potential competing interests: No potential competing interests to declare.

The content of the article is significant because its purpose is to alert about the use of these fraudulent products available on the Internet. However, the information about different types of products is insufficient, poor, and not specific. Study design: Insufficient description and confused. In Table 1, the citation of each case must include a reference.

It would be advisable to focus on companies that produce these fake supplements.

The present language quality needs to be improved. There are several grammatical, punctuation, conciseness, and spelling errors.

References: There are multiple grammatical and spelling errors.
