

Review of: "“Healing is having faith in Allah, the healer, and the medicine”: An exploratory qualitative study of Islamic-based healing practices in Northern Ghana"

Prosper Lutala

Potential competing interests: No potential competing interests to declare.

The current version has been well-written, with literature grounded in the field and almost comprehensive.

The different findings are well approached in the discussion, and the conclusion is rooted in the results.

I therefore recommend this manuscript for publication. Few weaknesses have been acknowledged by the authors.
