The review is too short for the topic title; please cite the reference properly in the text. In summary, while there are differences in how these products (cigars, hookahs, and electronic cigarettes) are used and the specific chemicals they contain, all of them can have negative effects on oral and overall health. It's important to be aware of the potential risks and to make informed choices about tobacco and nicotine use. Please can you make a scientific comparison between (cigars, hookahs, and electronic cigarettes) in detail regarding toxins and carcinogens, carbon monoxide, heavy metals, carcinogens, nicotine, and other harmful chemicals.
