# Mini-Mental State Examination 2 Standard Version Functional Test

National Cancer Institute

## Source

National Cancer Institute. *Mini-Mental State Examination 2 Standard Version Functional Test*. NCI Thesaurus. Code C150910.

An updated version of the Mini-Mental State Examination, a brief, quantitative measure of cognitive status in adults, that was originally developed by Marshal Folstein, Susan Folstein and Paul McHugh (Journal of Psychiatric Research, 1975), where the overall difficulty and raw score range remain the same despite modifications to some tasks and replacement of some items.
