Potential competing interests: No potential competing interests to declare.

This research is interesting and good. The results of the research are outlined in detail, but there are some notes to make this writing more perfect.

Introduction: Add relevant research on the HOT Box, and add an explanation of what formal explicit theory is to make it better. Method: It would be better to present the research method in the form of a flowchart or table to make it easier to understand. Conclusion: Can be written in a more complex outline based on the research question.
