Potential competing interests: No potential competing interests to declare.

The reviewer(s) wrote their comments in the PDF attached in the Supplementary data section of the present review.

I have several comments in the PDF.

Other comments:

1. Abbreviations and capitalization need to be consistent throughout the manuscript.
2. Genera needs to be italicized throughout the manuscript.

If the authors corrected and clarified my comments or even were able to legitimately refute them, I would suggest the manuscript be accepted to be published.
