Hi! Thanks for inviting me as one of the reviewers.

Here are the things that I'm wondering:

1. Who are the targeted respondents that always or sometimes use food delivery platforms? I'm aware that the author mentioned about dissemination of questionnaire on social media (convenience sampling) and snow ball sampling. Are they the ones who tried/always use the platforms?
2. What was the sample size? I could not find the exact number of respondents answered the questionnaire.
3. Results part of point Number 1 can be presented into a table/chart for better presentation.
4. Is the Conclusion part included discussion of the results?
5. The Recommendation part is about the suggestions for the food delivery platform operators. It's not the recommendation of future study right? Hence, suggest to move this part to Result part (before Conclusion).

It's good to initiate this study. Keep on going.
