Infantile hypophosphatasia

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base*. [*Infantile hypophosphatasia*](#). ORPHA:247651

Infantile hypophosphatasia (I-HPP) is a very rare, severe form of hypophosphatasia (see this term) characterized by infantile rickets without elevated serum alkaline phosphatase (ALP) activity and a wide range of clinical manifestations due to hypomineralization.
