This manuscript is intriguing; however, some revisions are necessary.

1. In the method section, please furnish comprehensive explanations for both the dependent variable and all the independent variables that have been employed.
2. Kindly elaborate on the categorization process for the severity of visual acuity in this study.
3. There is a discrepancy in the sample size, as the suggested sample size was 424; however, the results section indicates the inclusion of 624 respondents. Please provide a brief explanation for this inconsistency.
4. The depth of the discussion appears insufficient, and we kindly request a more comprehensive elaboration. Please provide thorough explanations, supported by relevant citations, to augment both the comprehensiveness and justification of the discussion.
5. Please elaborate on the inherent strengths of this study.
6. Please provide a comprehensive exploration of how the conclusions are grounded in the research outcomes and elaborate on the proposed strategies to alleviate the identified issues.
