

Review of: "Stakeholders' Perception of Socioecological Factors Influencing Forest Elephant Crop Depredation in Gabon, Central Africa"

Michel André Bouchard

Potential competing interests: No potential competing interests to declare.

The paper addresses an important issue and contributes substantially to the documentation around the general challenges of coexistence of development and wildlife by including perceptions and a documented hierarchy of components by various stakeholders. Paradoxically, the paper does not lack information on the methodology used; quite to the contrary, it has too much, and the methodology part needs both shortening and clarification.
