Review of: "Applying Behaviour Change Theory to Understand PhD Supervisors' Barriers and Enablers to Supporting PhD Students with Academic and Other-Sector Careers"

Dr. Mohammad Ichsan[1]

1 Binus University

Potential competing interests: No potential competing interests to declare.

Introduction: This section has been well defined and structured. Even though there is no graphical description, the narrative explanation is clear enough to point out the problem statement and aims of this study. Nevertheless, I have not seen any theoretical aspects that have been explained to support the way to solve the problem that is pointed out in this section. Typically, the theoretical framework is explained in a different section.

Method: This section is well narrated and explained.

Results and Analysis: This section is also narrated and explained in detail.

Discussion: I would put research limitations and suggestions for future research. Otherwise, this paper looks great.
