# Cytochrome b-c1 Complex Subunit 6, Mitochondrial

National Cancer Institute

## Source

National Cancer Institute. *Cytochrome b-c1 Complex Subunit 6, Mitochondrial*. NCI Thesaurus. Code C98092.

Cytochrome b-c1 complex subunit 6, mitochondrial (91 aa, ~11 kDa) is encoded by the human UQCRH gene. This protein plays a role in the assembly of the cytochrome b-c1 complex in the mitochondrial respiratory chain.
